1962 CHEVROLET JOBMASTER TRUCKS

built better...work longer!

When Chevrolet builds a truck, it builds a *quality truck.* This policy makes sense. Chevrolet trucks work a long time . . . cost less than many other makes to operate and maintain over the years . . . consistently bring a higher trade-in price . . . and, as a result, are bought by more people.

We invite you to come in and examine this quality closely and to take a 1962 demonstrator out for a good long test drive. Note the cab comfort, the good visibility, the smooth ride, the solid feel of its quality. Compare Chevrolet truck features with those of other makes. Then decide which are your wisest investment. We're sure it will be Chevrolet's.

Note how this Chevrolet cab roof is made of two sheets of metal, instead of one, with a layer of felt in between as insulation against cold, heat and noise.

A Chevrolet truck tailgate is sturdier because it has double-wall construction and strong steel chains in tough rubber casing to support it.

Quality independent front suspension fights road shock more effectively than other types—provides more protection for the truck, load and driver.

The standard 235-cu.-in. 6-cylinder Chevrolet truck engine has worked more miles than any other. There are nine more engines to choose from.

CHEVROLET See your Chevrolet dealer for trucks that keep running and running!
